 PROFESSIONAL SUMMARY

Senior Quality Engineer with 4+ years of experience in software quality assurance for web applications. Experienced in functional testing, smoke testing, regression testing, and API testing. Skilled in automation using Robot Framework and Python with a strong focus on identifying critical defects and improving release stability.

 WORK HISTORY

Senior Quality Engineer, *LTIMindtree*

2023 – 06/2026

Project: **Nokia Mediation Revamp**

- Designed and executed 100+ end-to-end test cases across Dashboard, System Overview, Lookup Servers, Lookup Data, and Rejected Data modules, achieving 95% functional coverage and ensuring accurate data processing across mediation flows.
- Logged and tracked 200+ defects in Jira with Stream configurations, Node-level failures, and Rejected Data patterns, reducing defect resolution time by 30%.
- Reduced page load time by 65% (20s to 7s) on Dashboard, Workspace, and Monitored Streams using Google Lighthouse audits, eliminating rendering bottlenecks and reducing monitoring latency during peak traffic.
- Validated REST API responses using Postman, verified JSON payloads, and compared backend data with UI to ensure data consistency.
- Executed SQL queries to validate backend data and ensure consistency between database records and the application UI.
- Automated end-to-end stream processing flows using Robot Framework, reducing manual regression effort by 70% and cutting validation time from 2 days to 4 hours per release.
- Reduced post-release defects by 25% by aligning with developers and PMs on Stream node configurations, Lookup Server updates, and Dashboard requirements, improving stream processing stability and ensuring uninterrupted mediation operations.

Quality Engineer, *LTIMindtree*

2021 – 2023

Project: **CloudRnP**

- Executed functional and performance testing across web application modules, validating end-to-end workflows and ensuring system reliability.
- Reduced system response time by 60% (10s to 4s) by identifying performance bottlenecks and driving targeted optimizations with the development team.
- Designed detailed test cases mapped directly to business requirements, ensuring full coverage of functional and edge case scenarios.
- Maintained QA documentation including test cases, scenarios, and execution reports, supporting audit readiness and team knowledge transfer.

- Logged and tracked defects in Jira with reproduction steps, severity ratings, and environment details, accelerating developer resolution.

 CORE SKILLS

Functional Testing

Smoke Testing

Regression Testing

Exploratory Testing

Performance Testing

Test Case Design

Test Case Execution

Python

Selenium Webdriver

Robot Framework

Jira

Agile/Scrum

REST API Testing

JSON Validation

SQL

UI Testing

SDLC

STLC

 TOOLS

Postman | Google Lighthouse | Jira | MS Excel | MS Word

 COLLEGE PROJECT

Avyanna, *Women Empowerment Website*
A dedicated platform that simplifies access to women's safety laws and legal rights, bridging the gap between complex legal language and everyday users — enabling women to search and explore legislation, protections, and legal resources designed for clarity, accessibility, and quick reference in critical situations.

 EDUCATION

Adamas University, *Bachelor of Computer Applications*
CGPA: 8.05

2021

 CERTIFICATION

Python
Certified by Udemy

 Languages

Bengali — Native

English — Proficient

Hindi — Conversational
